WORK EXPERIENCE

CORE DSP FLEET

Irvine, CA

Co-Founder / Full-Stack Engineer

Jun 2023 – Present

- Architected B2B SaaS platform serving 10 Amazon Delivery Service Partners with nearly \$2K MRR, overseeing fleet operations, compliance, and preventive maintenance for 500+ active vehicles.
- Built RESTful API with PHP/MySQL supporting real-time vehicle inspections, automated compliance alerts, and media storage for 5,000+ inspection photos, ensuring reliability and speed at scale.
- Implemented automated reminder system reducing missed inspections by 75% and improving DOT compliance rates to 98%, directly strengthening partner reliability metrics.
- Designed responsive React-based dashboard with role-based access control, shortening onboarding time for new fleet managers by 60% and improving workflow transparency.

BIKE LEGAL

Irvine, CA

In-House IT Specialist

July 2022 – May 2025

- Led end-to-end infrastructure migration from Microsoft 365 to Google Workspace for a 15-person law firm, reducing annual software costs by \$3,000 and simplifying administration.
- Maintained reliable IT infrastructure with minimal downtime across all office systems for a 3-year tenure.
- Provided same-day resolution for 95% of technical issues, minimizing attorney downtime, protecting billable hours, and improving IT response satisfaction scores.
- Established hardware replacement schedule and vendor relationships, reducing emergency equipment costs by 40%.

PROJECTS

Pipeline Planning

Oct 2025

- Built a full-stack SaaS platform that generates personalized academic transfer plans for community college students, guiding them to their target universities with optimized course schedules and zero wasted credits.
- Engineered multi-step conversational onboarding flow collecting academic history, target schools, and goals, then dynamically generating custom 2-year transfer roadmaps with real-time plan updates.
- Implemented subscription management with Stripe integration, real-time database syncing via Supabase, and admin dashboard with analytics for monitoring student progress.

Ripplet Connect

Sept 2025

- Architected and led development using React Native and Supabase for real-time social matching and interest-based discovery, bridging student communities through shared passions.
- Designed scalable API and caching layers to handle high-frequency user interactions, chat data, and profile customization, ensuring smooth performance under heavy load.
